SUMMARY

Software Developer with experience in automation, backend development, and system integration. At Accenture, I build Python-based solutions that connect SAP, Windows, and Linux environments, and develop secure web applications using FastAPI. Skilled in debugging, problem-solving, and optimizing business processes, with a strong focus on delivering reliable and practical solutions.

SKILLS

- **Programming:** Python, Java, SQL, Shell Scripting (Linux/Windows)
- **Web & Backend:** FastAPI, HTML, CSS, JavaScript
- **Automation & Integration:** SAP PyRFC, WinRM, SSH, ABAP Integration
- **Core Concepts:** Automation Framework Design, Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Error Handling & Logging
- **Libraries & Tools:** Git, GitHub, Azure DevOps, pandas, NumPy, JSON, regex, subprocess
- **AI & Emerging Technologies:** Prompt Engineering, Agentic AI, AI-Assisted Development
- **Strengths:** Debugging, Analytical Thinking, Problem Solving, Process Optimization

PROFESSIONAL EXPERIENCE

Packaged App Development Analyst – Python Developer | ACCENTURE

Feb 2024 – Present

- Built a Python-based automation tool for SAP and OS system administration processes, reducing manual workload equivalent to 10–15 staff per client across 40+ client projects.
- Developed cross-platform automation scripts integrating SAP (PyRFC), Windows (WinRM), and Linux (SSH), enabling automated execution and cutting process time by 30%.
- Designed and developed a secure FastAPI web application allowing clients to trigger automation scripts in restricted environments, making it easier for clients to use while meeting security requirements.
- Engineered Python scripts to dynamically invoke ABAP functions and manage SAP process flows via RFC calls and API interactions, improving reliability of SAP workflows.
- Applied OOP and DSA principles to develop modular automation components, improving performance and ease of maintenance.
- Utilized advanced Python features (regex, comprehensions, subprocess, threading) for data extraction, validation, and workflow automation, reducing error rates.
- Enhanced and debugged existing modules to optimize performance and ensure smooth integration with a .NET-based user interface.
- Acted as the primary point of contact for the Python team during lead absences, supporting technical decision-making and development activities.

Data Analyst – Intern | URJANET

June 2022 – November 2022

- Supported the maintenance and optimization of automated data pipelines, improving efficiency and reliability of data flow.
- Researched and resolved data issues and customer-reported discrepancies, ensuring accurate processing and timely resolution.

PROJECTS

Personal Portfolio Website | [Live Demo](#) | [GitHub](#)

Python • FastAPI • HTML • CSS • JavaScript • Jinja2 • SQLite • Render

- Built a personal portfolio website using FastAPI and deployed it on Render.
- Added a contact form that validates user input, stores messages, and sends email notifications.
- Organized the project into reusable templates and separate Python modules to keep the code easy to maintain.
- Deployed the application on Render and integrated it with GitHub for automatic deployments.
- Used AI tools to speed up development, troubleshoot issues, and explore different implementation approaches during the project.

EDUCATION

B.E. – Electronics and Communication Engineering | Easwari Engineering College

2019 – 2023 | CGPA: 8.92

ACHIEVEMENTS

ASE Best Cadet Award – Accenture (2025): Recognized as a top-performing Associate Software Engineer (ASE) cadet for technical excellence, ownership, and project contributions.

CERTIFICATIONS

- Reinvention with Agentic AI Learning Program (2026) – Accenture
- SQL (Intermediate) – HackerRank
- Oracle Cloud Infrastructure 2024 AI Certified Foundations Associate – Oracle
- Data Science using Python – Verzeo
